

2021-2022 MSOT Book Lis

This is the book list for the MSOT program curriculum as it currently exists. Please note this list is always subject to revision as new editions are released or when changes are made to courses. If the list is revised the changes will be given to you in a minimum of two months before the course begins. Books for each course are required unless it is specifically noted that the book is only recommended. Before the course list (immediately below) is a list of books which are used throughout the curriculum in multiple courses. Each student must have these texts during the entire program, therefore it is highly recommended you buy these texts instead of renting them. These books are no listed by the courses in which they are used in order to save pace but they will be on your course syllabi. An electronic version may be available for these books through the A.T. Still Memorial Library.

Program Level Required Books

Publication Manual of the American Psychological Association, 7th edition

Author: American Psychological Association (2019)
ISBN: 978-1-4338-3217-8
Publisher: American Psychological Association
